

JERUH JOHN WAYNE OBIAL

STUDENT DEVELOPER

Cagayan de oro City, Philippines | obialwayne@gmail.com | www.hexctl.dev

SUMMARY

Computer Engineering student and Student Developer with experience in full-stack development, AI, and software engineering. Skilled in building web applications and system-based solutions using modern technologies. Strong interest in problem-solving, system design, and creating efficient and scalable software. Passionate about continuous learning and improving technical skills through hands-on projects.

TECHNICAL SKILLS

Languages: Python, Javascript, Typescript, C ,C++ , SQL, HTML, CSS

Skills: Software Development, System Design, Artificial Intelligence (AI), Generative AI, Large Language Models (LLMs), Prompt Engineering, Machine Learning, Computer Vision, Internet of Things (IoT), API Integration, Problem Solving, Debugging, Automation, Scalable Systems

Tools: React, React Native, Next.js, Node.js, Express.js, REST APIs, Tailwind CSS, Git, AWS, TensorFlow, PyTorch, PostgreSQL, Anthropic Claude, Arduino, VS Code, Linux

EXPERIENCE

Student Developer, Google Developer Groups on Campus USTP

November 2025 - Present

- Led development of a web-based Lost and Found system, enabling efficient reporting and tracking of lost items.
- Contributed to the GDG On Campus website project, supporting design and implementation of core features.
- Led a tech event, managing coordination and ensuring successful execution for attendees.

Software Developer (Freelance)

November 2025 - Present

- Freelance Software Developer, creating automation scripts and developer tools for system optimization and workflow improvement.
- Built and maintained debugging and testing utilities to improve software reliability and development efficiency.

EDUCATION

Bachelor of Science in Computer Engineering

Aug 2024 - Present

University of Science and Technology of Southern Philippines

- Focused on technological innovation in computing systems, embedded systems, and intelligent software solutions.
- Independent research interest in electromyography (EMG) for gesture recognition and sign language translation device.

CERTIFICATIONS

Certificates: Coursera - Python for Data Science, AI & Development, Cisco Networking Academy - JavaScript Essentials 2, Cisco - Python Essentials 2, Google - Gemini Certification for University Students, CodeAI - Hour of Code

PROJECTS

- Cortex - AI agent memory layer designed to manage, store, and retrieve contextual information, improving consistency and long-term understanding across AI systems.
- Vault CLI - Self-hosted command-line tool for securely storing and managing secrets and sensitive data with local-first control.
